AHMET ERTÜRK

Full-Stack Developer & Cyber Security Student

Istanbul, Turkey

SUMMARY

I stepped into the IT sector with 4 years of software development education during high school, focusing on improving myself in backend web technologies. Combined with the cyber security education I started at university, I integrate my software development instincts with information security and log analysis practices. I am interested in designing modular structures using Core PHP and MVC architecture, aiming to enrich my skills in secure code development and system monitoring processes.

EDUCATION

Istanbul Bilgi University *2025 - Present*

A.S. in Information Security Technology

- Theoretical foundation and in-class laboratory practices covering information security standards, networking fundamentals, and log analysis.

Mareşal Fevzi Çakmak Multi-Program Anatolian High School *2021 - 2025*

Software Development Program

TECHNICAL SKILLS

Software Development: Core PHP, MVC Architecture, and Modular Software Design

Cyber Security & Monitoring: Splunk Ecosystem, SPL Query Foundations, OSINT Research Methodologies, and Endpoint Log Analysis

LANGUAGES

- **Turkish:** Native
- **English:** Focused on Technical Documentation Reading & Written Communication
